"September 7, 1829. During a gale from the westward on the night of September 3, the ship **Marquis of Anglesea** (352 tons) which had lately arrived (on August 23rd under the command of Captain W Stewart) with 130 settlers on board and anchored in Gage Roads close to the mouth of the Swan River, drove on shore, bilged and filled with water; all hands were saved with part of the cargo that remained unloaded.
