

You don't need to be a computer 'nerd' or expert to get some benefit from the Technology Interest Group (CIG). We welcome new WAGS members who want to get the most out of their computers to help them with their genealogy research.

**Our monthly meetings are designed to cover items of interest to the group and we generally follow an agenda like this:**

- Items of general interest from the computer world
- Keeping your computer safe and healthy from viruses, malware, scams and spam
- Genealogy programs – who's using which one, problems, queries
- Update on Genealogy sources, mostly websites
- Open forum – queries, comments, successes, problems
- FHWA/SIG business

Usually this is followed by a session using the big screen; either a demo of a pay-site or a website that may not be well-known, or a workshop/presentation/demo of some technique or genealogy software. **Download a copy of the SIG brochure** 

**For information on Email Scams, Phishing, Netiquette, Newsgroups, Mailing Lists, and Free Software Downloads, have a look at our:**   [Hints and Tips Online](#)
