

Dewey Classification - Outline of Relevant Classes

The Dewey classification originated in the nineteenth century, and knowledge has vastly expanded since then.

Although it is regularly updated, the main classes reflect their nineteenth century origins, and it was certainly not devised with genealogists in mind. However it is the most widely used general classification scheme in the world and does achieve its main purpose of bringing related material together, hence its continued use.

The main numbers relevant to our genealogical collection are set out below.

Most of the material is located in class 300 Social Sciences and class 900 History Geography Biography, with some items scattered throughout the other main classes.

200 Religion

Contains material about various religious groups such as Quakers, Catholics, Jews, as well as histories of specific churches
