

[Barber alias Nynne](#)

This is a family history website for the Barber and Taylor families who migrated from England to Australia in 1948 and 1950 and is the result of nearly 40 years of research. However, there is much more, as interests have expanded to other families, wills and surname studies in East Sussex - a quick look at the Publications page will illustrate (where nearly all are available for download). A total of over 20,000 people are presented here, many connected in large trees located primarily in Sussex and Kent in England. The Barber surname goes back to the 1500s in Rotherfield in Sussex, where it was Barber alias Nynne, hence the name of this site.
