

## Are men on Cheops Pyramid in groups?

There is a myth around the pyramid photo that the soldiers all lined up behind their respective officers, and in their Company or Section groupings.

There is some evidence that soldiers of the 11th Battalion, when they assembled on the pyramid for the Cheops photo, to some extent formed groups or clusters - but was it in company or section clusters?

Have a look at the new page on the 11th Battalion website for the answers. [Grid Clusters - Mystery or Myth](#)
