

**Newcomers welcome!**

Come along and support the WAGS CIG. As well as a selection of fascinating new and interesting snippets from the world of computers and genealogy.

Newbies welcome + open discussion on various topics of interest to genealogists & family historians, including genealogy computer programs and websites of interest.

Suggestions and discussion are very welcome. Bring your problems along, preferably documented so we can see what has (or has not) been done, and hopefully supply a solution.

See you there, especially if you bring cake!
