

Our DNA group aims to help you understand the uses and benefits of DNA testing as it applies to your own family research and to support your research by sharing information and expertise about how to interpret your test results.

We have regular meetings that cover a variety of topics such as ; guest speakers who shares their own DNA success stories, focussing on how DNA has been useful in solving a particular family tree puzzle or helping to break down a brick wall, technical presentations of various aspects of DNA testing, how to interpret DNA results, exploring the DNA tools and other current topics.

Anyone is welcome to our meetings, join our mailing list and our Facebook group. Further details are available by contacting the convenor at dna.sig@fhwa.org.au .

Our FB **DNA Special Interest group** <https://www.facebook.com/groups/fhwaDNAsig/> is our main forum for helping people and sharing information.
