

Projects of the Western Australian Genealogical Society

For many WAGS has undertaken projects to transcribe Western Australian (WA) records. These projects have resulted in unique records becoming readily available to the public for the first time.

Current projects that are underway include:

- Births and Death Indexes - from *The West Australian*
- Reunion and Can You Help? - entries from *The West Australian*
- WA Cemeteries Index - converting the WA microfiche index produced many years ago by Graham Bown and his team to digital format
- Indexing and scanning of a major Perth Funeral Directors' records
- Various other Projects are also being undertaken, including those by WAGS Special Interest Groups and Affiliated Societies

Volunteers are needed, and you can work from home, if you are interested in helping out please contact WAGS Projects Officer via eMail: [WAGS Projects Officer](#)
