

FHWA Activities

The Activities Committee is responsible for planning, developing and implementing a program aimed at improving the family research knowledge and skills of members, and others in the community.

We are also charged with promoting our activities through partnerships, and in cooperation with like-minded bodies.

Each year we run a number of events, which include free activities along with courses and workshops. These events are open to members and non-members alike, and are held at our premises in Bayswater unless otherwise indicated.

We invite you to have a look at what's on offer and make it a 'must' to book in for one now.

For more details about the programme go to:
