

New resource for FHWA members

Many Western Australians succumbed to the Spanish flu in 1919. This appendix to Ruth Johnson thesis "Unshed tears and stilled suffering" has been kindly offered to members of FamilyHistoryWA.

She says "This list is in no way definitive but lists the known victims from the remaining public records whose cause of death is stated as pneumonic influenza, Spanish influenza, influenza or pneumonia."

Members can login to see the alphabetical listing [here](#) .
