

Genealogy in Time annual survey

WAGS is mentioned in top 100 worldwide genealogy websites for 2013. Just outside the top 100 according to the article by Genealogy in Time Magazine, but right up there with the competition.

The annual review looks at genealogy websites worldwide and compares them according to their Alexa Ranking. We are well ahead of a number of Australian high profile sites, including commercial sites - so must be doing something right.

The full article makes interesting reading, WAGS is mentioned on page 6 and the full rankings are on page 8. If the ranking was done on another day, say Jan 11 when our Alexa Rank was 270,711, we would be in at number 98.
